

VLSI Physical Design Course

Offline | Hybrid | Online

Academic qualification for this course:

B.Tech /M.Tech with min 70 % through out in
ECE /EEE/VLSI

Cadence Tool
Lab Support

Placement
Assistance

1:1 Mentoring

PinE Training Academy

PinE Training Academy (Training Division of Aujus Technology Private Limited -Enabling VLSI Design) was established in 2014 by technocrats having expertise and vast work experience in the field of ASIC Design, FPGA, DSP, Real-Time Embedded System Design, and Board PCB.

SIEMENS

“At PinE Training Academy, my vision has always been to help electronics students move beyond theoretical learning and **develop the practical skills** required by the industry.

Having worked closely with students and companies for years, **I have seen the gap between academic education and real engineering roles.**

PinE was built to bridge that gap — by providing structured learning, strong fundamentals, and guided career pathways so that **students can confidently step into core engineering careers.**”

- Vaibhav Mishra
(Founder & CEO)

Top 5 reasons to choose PinE Training Academy

1. 100% Placement Support

PinE provides 100% placement assistance to the eligible trainees of the job-oriented programs and keeps supporting them till they get a job after course completion. Our primary objective is to help electronics engineers successfully build a career in the semiconductor /VLSI Industries. We work closely with various VLSI products & services companies and identify the right opportunities. Most of our students have been successfully placed in reknowned semiconductor companies.

2. VLSI courses delivered by industry experts

PinE Training Academy is a leading VLSI and Embedded training institute that delivers industry-standard, high-quality VLSI programs. Our courses are designed by experienced industry experts, aligned with real job opportunities and long-term career growth in the semiconductor sector. We continuously update our VLSI curriculum to match the latest industry trends.

3. Excellent Teaching Methodology

Our training methodology is unique, enabling students to master even complex technologies in a short time and build true expertise. Around 70% of the course is dedicated to hands-on labs, mini projects, and a final project. These programs help you develop the in-demand technical skills needed to secure a job in the semiconductor industry.

4. 1:1 Support

PinE Training Academy provides 1:1 mentoring and round-the-clock online support. Trainees also get 24/7 lab access to strengthen their technical skills and can join group discussions to learn and share insights. In addition, business communication sessions and mock interviews help build the professional skills needed to succeed in the workplace.

5. Flexible Payment & Financial Support

- Merit-Based Scholarship Program
- Interest-Free Monthly Installments
- Education Loan from NBFC Partners
- Auto-Debit Facility

EDA Partner

Get trained on Cadence industry grade tools and showcase your knowledge confidently in your interviews.

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

1. Hardware Digital Design

- Hardware Design of various combinational & sequential circuits and implementation on FPGAs.
- Project 1: Hardware Design of 4 bit Sign Calculator and implementation on FPGAs. Calculator Components like: Adder, Subtractor, Multiplier, Divider, Comparator, Mux, Demux, Encoder, Decoder, 2s Complement etc.
- Project 2: Hardware Design of 4 way traffic light control system and implementation on FPGAs.
- Traffic Light Components: Latch, SR Latch, JK latch, JK FF, DFF, TFF, Counters (Synchronous , Asynchronous , UPDown Odd –Even , Mod , Johnson & Ripple, Shift Registers (SISO, SIPO , PISO & PIPO)
- Project 3: Hardware Design of different Led Patterns & Implementation on FPGAs.
- Project 4: Hardware Design of FIFO & LIFO Implementation on FPGAs.
- Project 5: Hardware Design of Digital Clock and Stopwatch & Implementation on FPGAs.

2. CPLD & FPGA Introduction

- Introduction to FPGA & CPLD
- Application of FPGA & CPLD
- Advantage & Disadvantage of FPGA & CPLD
- CPLD & FPGA Architecture
- FPGA & FLOW
- Development Board: Nexys A7, Artix 7 series development board from Digilent inc.

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

3. Analog Network

- Fundamentals of Network
 - Condition of flow of current
 - Power consumption and Tellegans theorem
 - Resistance
 - Electrical Energy Sources
 - node, mesh and loops
 - Kirchoff law
 - Voltage division principle
 - current division principle
 - source transformation
 - resistance reduction techniques
 - mesh analysis
 - nodal analysis
- Network Theorems
 - Linear theorem
 - Thevenin
 - Norton
 - max power theorem
- Inductor
- Capacitor
- DC Transient Analysis

4. Analog EDC (Electronics Design Circuits)

- Drift current
- Diffusion current

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

- Channel width and effect on it by various factor
- P-N junction
- Diode fundamentals
- MOSFET operation
- Leakage current
- Effects on operation by doping and temp
- Temp inversion

5. Verilog

- Introduction of RTL & FPGA Flow.
- Introduction of Verilog.
- Methodologies
 - Gate Level
 - Data Flow
 - Behavioral
 - Test Bench
 - FSM Modeling
 - Synthesis- RTL Flow, Technology Flow
- Programming : Implementation of all combinational & sequential circuits on FPGA using Verilog.
- Project 1 : LED Implementation of 4bit Sign calculator on FPGA using Gate level Verilog.
- Project2 : SSD Implementation of Traffic Light Controller on FPGA using Behavioral FSM Modeling
- Project 3 : SSD Implementation of Digital Clock on FPGA using Verilog.
- Project 4 : SSD Implementation of Stop watch on FPGA using Verilog

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

6. UNIX

- The Basics of UNIX and how it's different from Windows.
- Introduction of SHELL.
- File and Directories.
- Home Directory and .xshrc files (.bashrc, .cshrc, etc.)
- Introduction to inode
- Types of files, symbolic and hard links
- Permissions of files, timestamps in unix.
- Basic Commands-cp, mv, rm, touch, which, mkdir ,cat, find, cut, paste, tr, ls, ps, sort, etc.
- Sed, awk, grep (regex), commands.

7. BASH

- Shell scripting, structure of a script, usage of loops, conditional statements, functions, arguments and array.

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

8. TCL-TK

- TCL:
 - Set ,Puts
 - String cmd & its various options compare ,equal, first, last ,index, is class, length, map, match, range, repeat, replace, reverse, tolower, toupper, totitle, trim, trimleft, trimright, wordstart, wordend.
 - List and its various options lappend, lindex, linsert, llength, lmap, lrange, lrepeat, lreplace, lreverse, lsearch, lset, lsort, Concat, Format, Scan, Glob, Global, Incr, Expr, Join, Split, foreach loop, If loop, for loop, switch, while loop, catch, clock, regexp, regsub
 - Tcl procedures- return,non return, args,optional arguments etc.
 - file handling:- open & close
 - file command and its various options, argc,argv,argv0, arrays, upvar, after, Namespaces Source, Unset, Exec, Exit, Flush, Time, Break, Continue, Read
- TK:
 - Basics of TK (Tool Kit), wish interpreter, advantages of T
 - Widgets, types of widgets (basic, hierarchical), selection widget, frame widget, pack proopgate, text widget, scrollbar widget, canvas widget, bitmaps, fonts, tk_messageBox.

9. Introduction of IC Design Flow & CMOS Fundamental

- Understanding of ASIC design flow and its all stages along with inputs and outputs of every stage and all checks.
- Introduction of MOSFET, Its construction and working.
- Basic principle and characteristics of CMOS
- Implementations of digital circuits using CMOS.
- Different types of Basics gates used in ASIC design.

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

10. TCL-TK

- Understanding of different data types
 - LEF
 - Libs
 - DEF
 - SPEF
 - Netlist
 - SDC
- Different types of PVT conditions
- Understanding of Netlist to GDS flow
 - Floor planning
 - Power planning
 - Placement
 - CTS
 - Routing

11. Floorplanning

- What is Floorplanning
- Objective of Floorplanning
- Inputs and outputs of Floorplanning
- What is core and die.
- Die size estimation, design utilization and aspect Ratio.
- IO placement
- Macro Placement
- Different types of Physical cells

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

- Different types of Blockages
- Channel estimation between two macros.
- Guidelines of Floorplanning.
- Common issues and challenges in Floorplanning.

12. Power Planning

- What is power analysis
- IR and EM analysis
- P/G grid distribution
- Why worry about voltage drop

13. Power Planning

- What and why placement
- Goals of Placement
- What is standard cells
- Types of placement strategies
- Placement optimization techniques
- Understanding of timing constraints
- Cell and nets delay calculation
- Congestion and how to analyse and deal with it
- Different types of Vt cells
- Real Design Placement challenges

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

14. Clock Tree Synthesis

- What is CTS and why we need it
- Goal of CTS
- Input and output of CTS stage
- Different terminologies of CTS like ,
 - Skew
 - Clock latency and network latency
 - Clock transition
 - clock jitter
 - clock uncertainty
- CTS constraints and specifications
- CTS strategies and techniques
- Understanding of CCOPT
- CTS challenges

15. Routing

- What is Routing and why should we need it.
- Goals of Routing
- Input and output of routing stage
- HVH and VHV models
- Routing operations
 - Global Routing
 - Track Assignment
 - Detail Routing
 - Search and Repair
- Routing challenges
- Types of DRC and how to clean it

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

16. STA Fundamentals

- What is STA and why we need to do STA in the flow
- Inputs and outputs of STA.
- Different types of STA terminologies
- What are Setup and Hold time and its Mathematical equations.
- Setup and hold time calculation with examples
- Different techniques used to fix setup and hold issue in the different stages.
- Crosstalk and Noise.
- OCV and its effect on setup and Hold.
- Skew , Uncertainty, Jitter, Slew, DRV etc

17. Sign off

- Different types of physical verification check including
 - DRC check
 - LVS check
 - Antenna check
 - CDM check
 - ERC checks
 - DRC checks
 - Timing closure
 - Electromigration.
 - IR
 - Latchup
- RC extraction
- ECO

COURSE CURRICULUM

Physical Design

Offline | Hybrid | Online

19 modules

OS- Linux Ubuntu | EDA Tool - Cadence

18. Perl

- Perl basic concepts and Syntax
- Different Data Types and Data Structure of Perl
- Regex
- File Handling and Error Handling
- Perl Packages
- Scoping of variable

19. Python

- Basic concepts
- Python Data types
- Python Loop
- Python Function
- Python Lambda
- Python Regex
- Python OOPS

Note- The Institute has full right to select the modules as per the requirement of the industry and also depend on the duration of the batch without affecting the course fees

Course Information

New batch starts every

January

April

July

October

Course Duration

- Offline - **6 months**
- Hybrid - **10 months**
- Online - **12 months**

Course Fees

The fees will vary for different modes-online, hybrid and offline and can range between INR 90k - 1.15lacs + tax

Scholarship

The scholarship will be given based on the entrance test.

Score 90% or above - **40% scholarship**

Score 75% or above - **20% scholarship**

Prerequisite for Entrance Test: Basic Knowledge of Analog & Digital Design Fundamentals

**C 56/36, 1ST FLOOR, SECTOR 62, NOIDA,
UTTAR PRADESH 201309**

 **info@pinetrainingacademy.com**

 **9999037484**
